

CC ReviewFramework

Subject of Review	Issue for review	Decision being contested	who can apply	deadlines for applying	Eligible for IFO review?	Questions/issues	Special Considerations
Delegation (a completely new ccTLD as a result of MA action with respect to ISO-3166)	Failure to accept an application	PTI confirmation (is this public?)	Applicant	30 days after decision is published or Tolling for other mechanisms (TBD)	No, not a cc manager	Has PTI ever refused a new delegation request?	None if no competing applications - mediation vs timeline for submitting?
Delegation (a completely new ccTLD as a result of MA action with respect to ISO-3166)	Contesting an approved but pending delegation	ICANN Board Minutes	Losing Applicant(s)	30 days after decision is published or Tolling for other mechanisms (TBD)	No, not a cc manager	Should PTI publish a list of active delegation requests? Should there be a cutoff date when a third party can apply for the delegation after the first application? Should there be minimum requirements to be met in an application (to avoid spurious applications)? PTI would have to wait 30 days before delegating in the root to see if there is an appeal.	Yes - should provide adequate time for a party to submit a request for a review prior to implementation - then if accepted hold the decision until it is resolved. - mediation vs timeline for submitting?
Transfer	Failure to accept an application	PTI confirmation (is this public?)	Applicants	30 days after decision is published or Tolling for other mechanisms (TBD)	Yes, one of the applicants is the current Manager		None if no competing applications - mediation vs timeline for submitting?
Transfer	Contesting an approved but pending transfer		None				
Retirement	Change of status of an exceptionally reserved code which is a ccTLD and IFO deciding to retire it because of the change.	PTI Notice of Retirement	Current ccTLD Manager	30 days after Notice or Retirement is sent or Tolling for other mechanisms (TBD)	Yes		No given the retirement timeframes are long enough to allow for an appeal before there is an implementation that is difficult to undo. - mediation vs timeline for submitting?
Retirement	Failure to grant an extension (or grant the extension requested?)	PTI notice to applicant rejection request	Current ccTLD Manager	30 days after decision is published or Tolling for other mechanisms (TBD)	Yes	This is not a decision about the existence/responsibility of a ccTLD - should the appeal of this be limited to the IFO review and or mediation?	No given the retirement timeframes are long enough to allow for an appeal before there is an implementation that is difficult to undo. - mediation vs timeline for submitting?
Revocation	Contesting an approved revocation by PTI	ICANN Board Minutes? (unclear if this requires Board approval as it has never occurred - however one would assume it does?)	Current ccTLD Manager	30 days after decision is published or Tolling for other mechanisms (TBD)	Yes	This would imply that PTI would have to wait 30 days after the approval of the revocation prior to taking any action.	Given a Revocation should be followed to a Delegation to a new Manager for the ccTLD should the Manager who was revoked be limited to appealing the Revocation and not be allowed to contest the Delegation to a new Manager once the Revocation be carried out (appealed or not)?
Failure to accept a proposed IDN ccTLD string.	Contesting ICANN rejection the proposed string for an IDN ccTLD	Unclear what officially constitutes a rejection (IDN policy - TBD)	Applicant + (residence/place of business in country and support or non-objection from govt)?	30 days after decision is published or mediation completed?	No	Uncertain if applicable to this PDP at this point. Applicant feels their string proposal meets the requirements (does ICANN produce a detailed explanation of the reasons for the rejection? IDN ccTLD Policy - TBD)	None
