Status of ToDo's

(as of noon KST on 14 May)

==

[[Premise]]

ToDo-1 <must>   Each participant understands what RootLGR is and
                   what is expected for GPs to do.

ToDo-2 <must>   Each participant understands Yoneya's algorithm
                   that was already sent to CGP/JGP/KGP by Yoneya and
                   also agreed by C and J in Dallas, which is attached
                   to this mail as well

ToDo-3 <must>   Each participant understands MSS concept that was
                   already sent to CGP/JGP/KGP by Dr. Wang Wei, which
                   is attached to this mail along with HiroHOTTA's
                   response

ToDo-4 <expected> Participants agree on Yoneya's algorithm as a
                   framework and also agree on partial usage of MSS
                   to accelerate our discussion ("partial" means
                   "J doesn't need to be considered to be incorporated
                   into MSS")   This is expected to be discussed and
                   finalized online before our meeting

[[Integration Algorithm]]

ToDo-5 <expected> J gets IP's feedback on Yoneya's algorithm

   ==> done

[[MSS/LGR-1]]

ToDo-6 <must>   C prepares MSS repertoire, which may be
                   equivalent to Chinese LGR-1 repertoire   (done?)

   ==> done

ToDo-7 <expected> C prepares Chinese variants within MSS, which may
                   be equivalent to Chinese LGR-1 (planned date is
                   expected to be declared, if not in time for the
                   meeting)

   ==> done

ToDo-8 <must>   J prepares Japanese LGR-1 repertoire and variants
                     (there's no variants in Japanese LGR-1 : they
                      were already sent to CGP/JGP/KGP)

   ==> done

ToDo-9 <must>   K prepares the basic idea of Korean LGR-1 repertoire
                   and variants

```
 61:    ==> working (hopefully to be done before noon on 15 May)
 62:
 63: ToDo-10<expected> K prepares Korean LGR-1 repertoire and variants
 64:                   (planned date is expected to be declared, ift
 65:                    LGR-1 does not come in time for the meeting)
 66:
 67:    ==> working (hopefully to be done before noon on 15 May)
 68:
 69: ToDo-11<expected> each of CGP/JGP/KGP assesses the repertoires and
 70:                   variants that have already been provided by other
 71:                   GPs as far as possible
 72:
 73:    ==> working (assesing each other)
 74:
 75: [[Logistics/etc.]]
 76:
 77: ToDo-12<must>     each CGP/JGP/KGP Chair designates a person in charge
 78:                   of ToDo-5 to ToDo-11 well in advance to the meeting
 79:                   (expected to post the (names) in replying this mail
 80:                   by May 1st)  - this may accelerate the coordination
 81:                   a lot
 82:
 83:    ==> working (C:Wang Wei, J:Yoneya, K:???)
 84:
 85: ToDo-13<must>     convener fixes the agenda through consultation with
 86:                   CJK colleagues  (Hiro is pleased to behave as the
 87:                   convener until someone will raise his/her hand)
 88:
 89:    ==> working (fixed Monday night, 11 May)
 90:
 91: [[Integration Algorithm - additional]]
 92:
 93: ToDo-14<expected> each of CGP/JGP/KGP reviews the feedback from IP as
 94:                   a result of ToDo-5, and drafts questions and comments
 95:                   to IP and sends it to Hiro<hotta@jprs.co.jp> and
 96:                   Yoneya<yoshiro.yoneya@jprs.co.jp> by Monday night,
 97:                   11 May,
 98:                   and then Hiro and Yoneya will compile the questions
 99:                   and comments into one file and send it to IP on
100:                   Tuesday morning
101:
102:    ==> JGP gave questions to IP on 11 May
103:        IP have answers on 12 May
104:
```
