

Agreement

Yoneya's Algorithm will be basically used in CJK's LGR development.(Edmon will revise)

Action Item1

Yoneya will contact IP and they come up with the definition of "type" and "subtype". And will take it to this meeting in writing tomorrow morning

Action Item2

Hiro will come back to this meeting tomorrow morning with a clear description about what the issue regarding "number of allocatable variant labels should be limited to at most 3" is.

Action Item3 (About Step4)

Mr. Yoneya and C and K chairs re-word step4 before at the start of the meeting.

Action Item4

KGP will respond tomorrow morning regarding KGP's plan.

Action Item5

MR. Wang will write down questions to IP (tonight) and send it to IP.

Sum2 (conclude)

IF 3GP share some subtypes

Ex, C want to S,T,B/ J want to just A (They don't share subtype)

3GP don't need to coordinate WLE = YES
