

## **RrSG Response to Proposed Revisions to Bylaws Section 11 – Additional Voting Thresholds**

The Registrar Stakeholder Group (RrSG) recognises and appreciates the work of the GNSO Council that went into finding agreement on the additional GNSO voting thresholds. The RrSG agrees that the 10 noted actions, which arise from the GNSO being a Decisional Participant in the Empowered Community, should each have the different stated thresholds for an affirmative vote, rather than the standard simple majority vote of each house.

The GNSO Council worked hard to reach consensus on the voting thresholds required for each of these actions and the RrSG believes them to have made the right decisions. We therefore fully support the GNSO Council's recommendation to adopt these proposed changes to voting thresholds in section 11.3.i of the ICANN Bylaws.
