Introduction

1. Internet Governance Principles

2. Roadmap for the future evolution of the Internet governance

1. INTERNET GOVERNANCE PRINCIPLES

¶ 1 NETmundial identified a set of common principles and important values that may contribute for an inclusive, multistakeholder, effective, legitimate, and evolving Internet governance framework. 5

¶ 2 **HUMAN RIGHTS** 9

Human rights are central values and universal as reflected in the Universal Declaration of Human Rights and that should underpin Internet governance principles. Rights that people have **offline** must also be protected **online**, in accordance with international human rights legal obligations, including the International Covenants on Civil and Political Rights and Economic, Social and Cultural Rights. Those rights include, but are not limited to:

Labelling rights as being "online or offline" is problematic as don't know how the technology might evolve. Article 19 of the UDHR universality principle could be used. For instance,,

Rights must be protected… through any media and regardless of frontiers…
