

## Executive Summary

---

On 1 December 2016, the GNSO Council directed 'ICANN Policy Staff to draft proposed language for any necessary modifications or additions to the GNSO Operating Procedures and, if applicable, those parts of the ICANN Bylaws pertaining to the GNSO. The GNSO Council requests that ICANN Legal evaluate whether the proposed modifications are consistent with the post-transition Bylaws and report their findings to the GNSO Council'. In its analysis of the DT recommendations, staff took a minimalist approach by focusing on the minimum changes needed to implement the DT recommendations, recognizing that in certain cases additional work may be desirable to facilitate the GNSO's participation in the Empowered Community, such as creating templates or fact sheets. Where applicable, this further work has been flagged. The GNSO Council will need to determine when and whom is expected to carry out this work which could result in further changes or additions to the GNSO Operating Procedures.

Based on this analysis, staff concluded that any necessary modifications or additions can basically be categorized as follows (with some covering more than one category):

1. No new procedures and/or modifications to the ICANN Bylaws or GNSO Operating Procedures are needed as the current Bylaws and/or GNSO Operating Procedures provide sufficient guidance. For example, for those situations in which the DT indicated that a simple majority vote of each house would be applicable, no changes are needed as this is the default GNSO Council voting threshold. Also, for a number of sections detailed steps are provided that need to be followed. This applies to items #1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 28, 31, 32, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 47 and 49 Annex A.
2. No new procedures and/or modifications to the ICANN Bylaws or GNSO Operating Procedures are needed as a separate mechanism is in the process of being created which will deal with the required actions in relation to appointments and nominations. This applies to items #3, 4 and 9 in Annex A.
3. Changes to section 11.3.i of the ICANN Bylaws to reflect new GNSO voting thresholds<sup>1</sup> which are different from the current threshold of a simple majority vote of each House. This applies to items #12, 26, 27, 29, 30, 36, 44, 45 and 46 in Annex A.

However, in undertaking this work, staff did identify a number of questions and made a number of assumptions that it is requesting the DTs input on before this document and the revised ICANN Bylaws and GNSO Operating Procedures are published for public comment. These assumptions and questions have been highlighted in the subsequent table in the fifth column in addition to legal assessment observations that can be found in the sixth column. In summary, the main questions and legal assessment issues that staff is looking for guidance from the DT on before being able to publish the proposed changes for public comment:

Item Number	Questions Identified	Legal Assessment
<b>1 (Reconsideration requests; (IRP) for covered ICANN</b>	Should any specific guidance, for example in the form of a template, be provided for the submission of such a request? If yes, can this be developed at a later date?	

---

<sup>1</sup> Note, this only applies to voting thresholds that are not already specifically called out in the ICANN Bylaws but which are the result of the Bylaws DT recommendations.

<b>actions</b>		
<b>4 (Specific Reviews)</b>		The Drafting Team proposes that “decisions to approve the 21 total review team members shall be presented to Council for approval by a majority of each House.” We note that the Bylaws do not grant SO/ACs any special approval rights over the entire slate of review team members. If the Drafting Team’s concern is to guide who the GNSO Chair selects for the remaining slots in the review teams (in collaboration with the other SO/AC Chairs), the Drafting Team could consider providing interim decisional guidance to the GNSO Chair when participating in the process (e.g. criteria, ranking, etc.).
<b>5 (Community Mediation)</b>	Should any specific guidance, for example in the form of a template, be provided for the submission of such a request? If yes, can this be developed at a later date?	
<b>15 (CSC Composition, Appointment, Term and removal)</b>	Should the RySG procedure for appointing members be documented in the same way in the GNSO Operating Procedures as the Board member selection process is?	
<b>26 (Inspection)</b>		<p>For subpart (a), the Drafting Team’s recommended is that “Any GNSO Stakeholder Group or Constituency may request ICANN document inspection. This request would be automatically communicated by the GNSO’s Decisional Participant representative, and would not require action by GNSO Council. In addition, GNSO Council may request ICANN document inspection, with approval by 1/4 of each House or majority of one House.”</p> <p>We note that granting of an inspection right directly to a Stakeholder Group or Constituency, without any requirement that it pass through the Decisional Participant (here, the GNSO) seems to run afoul of Section 22.7(d), which specifically limits this right: “The inspection rights provided to the Decisional Participants are granted to the Decisional Participants and are not granted or available to any other person or entity.” We advise that action be required at the GNSO level to confirm that any request issued in the GNSO name meets the specific form and requirements set out in Section 22.7 as a whole. While the low approval threshold may not be optimal, it is better to have a</p>

		low threshold than no threshold at all to demonstrate an action taken in the name of the full GNSO.
<b>27 (Inspection)</b>		<p>For subpart (e) regarding remedies for Decisional Participants who believe that ICANN has violated Section 22.7, the Drafting Team’s recommendation is that the “requesting Constituency or SG may decide whether to seek the remedy. If Council was the requesting entity, Council may seek review with approval by 1/4 of each House or majority of one House.”</p> <p>Please take note our comments for Item 26 as this recommendation is related. Whichever portion of the GNSO is seeking to challenge the response will still be doing so in the GNSO’s name. There should be some process for indicating the GNSO’s agreement with using this escalation method, even if by a low threshold. Because of the potential for use of ICANN’s other accountability mechanisms, up to Board recall, there should be some checks that the broader GNSO is aligned with in escalating the matter.</p>
<b>37 (Petition Process)</b>	The standards that should be developed for how a petition is raised in the GNSO do not seem to have been addressed by the Drafting Team. Is it simply by motion, as other things would get on the Council agenda? Who can raise? What about special timing considerations to meet the timing of the EC process?	
<b>44 (Nominating Director Committee Removal Process)</b>	The standards that should be developed for how a petition/issue is raised in the GNSO do not seem to have been addressed by the Drafting Team. How can people raise any of these petition/initiation issues? Will individuals be allowed? Must it be through Councilors? Should there be processes within the SGs or Constituencies on how to escalate to a petition?	

<p><b>45 (SO/AC Director Removal Process)</b></p>	<p>Further guidance is needed before a recommendation can be made, namely: How to apply the <math>\frac{3}{4}</math> threshold (which would be added to section 11.3.i of the ICANN Bylaws) – is this <math>\frac{3}{4}</math> of Council members, <math>\frac{3}{4}</math> of each house or <math>\frac{3}{4}</math> of the House that appointed the Board member in question?</p> <p>As with #44 above, the standards that should be developed for how a petition/issue is raised in the GNSO do not seem to have been addressed by the Drafting Team. How can people raise any of these petition/initiation issues? Will individuals be allowed? Must it be through councilors? Should there be processes within the SGs or Constituencies on how to escalate to a petition?</p>	<p>The discussion of whether the <math>\frac{3}{4}</math> threshold required in Bylaws Annex D, Section 3.2(f) should be applied across the GNSO Council or only in the House that nominated the Director seems to be a bit vague. However, we want to highlight the language of the IANA Stewardship Proposal, which says, “If a three-quarters majority within the nominated SO or AC supports using the power... the EC will use its power. The SO or AC will also publish and explanation of why it has chosen to do so.”</p> <p>Therefore, the Proposal supports that the use of this power should be at the SO/AC level, and not a subcomponent, and the reference to internal procedures is about how each SO/AC might demonstrate <math>\frac{3}{4}</math> support.</p>
<p><b>46 (Board Recall Process)</b></p>	<p>As with #44 and 45, the standards that should be developed for how a petition/issue is raised in the GNSO do not seem to have been addressed by the Drafting Team. How can people raise any of these petition/initiation issues? Will individuals be allowed? Must it be through councilors? Should there be processes within the SGs or Constituencies on how to escalate to a petition?</p>	<p>The discussion of whether the <math>\frac{3}{4}</math> threshold required in Bylaws Annex D, Section 3.2(f) should be applied across the GNSO Council or only in the House that nominated the director seems to be a bit vague. However, we want to highlight the language of the IANA Stewardship Proposal, which says, “If a three-quarters majority within the nominated SO or AC supports using the power... the EC will use its power. ## **Annex A - Drafting Team (DT) recommendations applied to table by staff, listing potential changes to Bylaws and GNSO Operating Procedures**

This table is color-coded to match 3 categories of decisions analyzed by the Drafting Team (DT):

### **Nominations for GNSO representatives on Empowered Community Administration, Customer Service Committee, IANA Functions Review Team, and other review teams in new Bylaws**

*The consensus recommendation is that a majority of each house is the appropriate threshold for nominations to roles created in the new Bylaws.*

### **Decisions made by GNSO to initiate or respond to Empowered Community petitions, instruct the GNSO Empowered Community Representative, and initiate investigations (per Bylaws Sections 22.8)**

*The consensus recommendation is that a majority of each house is the appropriate threshold to make most EC decisions, and that a GNSO Supermajority is the appropriate threshold for certain decisions, as indicated below.*

### **Decisions made by GNSO on its own. e.g., request document inspection (Bylaws 22.7(a) and (e))**

*The DT unanimously recommends that any GNSO Stakeholder Group or Constituency be empowered to request ICANN document inspection per Bylaws 22.7(a) and (e). This request would be automatically communicated by the GNSO's Decisional Participant representative, and would not require action by GNSO Council.*  
*In addition, the DT has a consensus recommendation to empower GNSO Council to request ICANN document inspection per Bylaws 22.7(a) and (e), with approval by 1/4 of each House or majority of one House.*

Note: the table below includes excerpts from the new ICANN Bylaws, at <https://www.icann.org/resources/pages/governance/bylaws-en>.
