

	RrSG Response to Final Report Recommendations
Recommendation 1	Support RySG comments
Recommendation 2	The RrSG supports the intent of this recommendation, but more clarity is required. We would encourage an OCTO representative to meet with the EPDP team during the next phase of its work and provide more information around what research would be done, what data is required, and how this would be balanced against the privacy rights of the data subjects.
Recommendation 3	Support recommendation
Recommendation 4	Support recommendation
Recommendation 5	Support recommendation
Recommendation 6	Propose amended text for clarity: The EPDP Team recommends that, as soon as commercially reasonable, Registrar must provide the opportunity for the Registered Name Holder to provide its Consent to publish redacted contact information in the RDS for the sponsoring registrar. (change additional to redacted)

Recommendation 15	Support recommendation
Recommendation 16	Support recommendation
Recommendation 17	Support RySG comments
Recommendation 18	The RrSG supports the RySG comments on Recommendation 18. Any policy-mandated timeframe for responding to a disclosure request must be set by individual Registrars, as this is dependent upon a number of factors (including volume/complexity of requests). which may make it impossible to adhere to an externally-determined requirement. The RrSG is hesitant to commit contracted parties to set deadlines without any flexibility. RrSG can commit to a "best effort" timeframe to process the request as fast as possible, whilst still being mindful of the above mentioned factors.
