## **Work Track 5 meeting**

4 April 2018

## **Agenda**

Welcome/Agenda review/SOI updates (5 mins)

Update from ICANN61 and where are we now?
(15 mins)

2

Review of existing defined geographic terms (65 mins)

AOB (5 mins)

# **Update from ICANN61 and where are we now?**

Agenda Item #2

#### **Update from ICANN61**

- WT5 held a public session at ICANN61
  - provided a brief background and summary of progress
  - Presented the timeline the group is working towards to deliver an Initial Report in July
  - Discussed future treatment of geographic terms contained within the 2012 Applicant Guidebook (AGB).
- Slides, transcript and video stream can be accessed via the ICANN61
   Meeting Schedule page <a href="https://61.schedule.icann.org/meetings/647704">https://61.schedule.icann.org/meetings/647704</a>
- Feedback from the session has been incorporated into the working document for the Work Track: - <a href="https://docs.google.com/spreadsheets/d/1FuPEq0y-cdSUQ1nvhWKhVnG8PLaC2RYXsCpQu91FDqo/edit#gid=358523414">https://docs.google.com/spreadsheets/d/1FuPEq0y-cdSUQ1nvhWKhVnG8PLaC2RYXsCpQu91FDqo/edit#gid=358523414</a>
- Some members raised concerns about the format of the spreadsheet used to track deliberations. Suggestions for alternatives are welcome.

#### **Work Track 5 Work Plan**

#### Where are we now?

- Drawing on the conversation during the ICANN61 session, the Work Track co-leaders submit the following proposals for consideration:
  - 2-character country codes (ISO 3166): Maintain the status quo, reserving all 2 letter-letter ASCII combinations for existing and future country codes.
  - 3-character country codes (ISO 3166): Maintain the status quo, i.e. not available, and defer broader questions about which entity/entities can apply for these strings and how they may be treated (for instance, as a gTLD, a ccTLD or something else).
  - O Long and short form of country and territory names (ISO 3166): Maintain the status quo, i.e. not available, and defer broader questions about which entity/entities can apply for these strings and how they may be treated (for instance, as a gTLD, a ccTLD or something else).

## Review of existing defined geographic names

Agenda Item #3

#### **Review of Existing Country and Territory Names**

As a reminder, in the 2012 Application Guidebook, the following country and territory names were not available (see section 2.2.1.4.1):

- I. it is an alpha-3 code listed in the ISO 3166-1 standard. \*\*discussed at ICANN61\*\*
- it is a long-form name listed in the ISO 3166-1 standard, or a translation of the long-form name in any language. \*\*discussed at ICANN61\*\*
- it is a short-form name listed in the ISO 3166-1 standard, or a translation of the short-form name in any language. \*\*discussed at ICANN61 \*\*
- it is the short- or long-form name association with a code that has been designated as "exceptionally reserved" by the ISO 3166 Maintenance Agency.
- v. it is a separable component of a country name designated on the "Separable Country Names List," or is a translation of a name appearing on the list, in any language. See the Annex at the end of this module.
- vi. it is a permutation or transposition of any of the names included in items (i) through (v). Permutations include removal of spaces, insertion of punctuation, and addition or removal of grammatical articles like "the." A transposition is considered a change in the sequence of the long or short–form name, for example, "RepublicCzech" or "IslandsCayman."
- vii. it is a name by which a country is commonly known, as demonstrated by evidence that the country is recognized by that name by an intergovernmental or treaty organization.

### **Future Treatment – Country and Territory Names**

We are now discussing future treatment of the following country and territory names:

- it is the short- or long-form name association with a code that has been designated as "exceptionally reserved" by the ISO 3166 Maintenance Agency. (example: .eu)
- it is a separable component of a country name designated on the "Separable Country Names List," or is a translation of a name appearing on the list, in any language. See the Annex at the end of this module. (example: Aland, separable component of Aland Islands)
- it is a permutation or transposition of any of the names included in items (i) through (v). Permutations include removal of spaces, insertion of punctuation, and addition or removal of grammatical articles like "the." A transposition is considered a change in the sequence of the long or short–form name, for example, "RepublicCzech" or "IslandsCayman." (note: transposition does not apply to 3-letter codes)
- it is a name by which a country is commonly known, as demonstrated by evidence that the country is recognized by that name by an intergovernmental or treaty organization. (Holland for the Netherlands)

#### **Future Treatment – Other Geographic Names**

- Additional categories of geographic names were specified in the 2012
   Applicant Guidebook and required consent or non-objection from relevant governments or public authorities.
- We will next discuss the future treatment of these terms.

A representation, in any language, of a capital city name of any country or territory listed in ISO 3166-1

Examples: London-Londres-Llundain / Berlin-Berlino

**Policy (2007 PDP):** Available, but challenge mechanism to governments to initiate an objection. Applicants should be aware of GAC Principles. Applicants must represent that the use of the proposed string is not in violation of the national laws in which the applicant is incorporated.

**Implementation (2012 AGB):** Requiring support/non-objection from relevant governments or public authorities.

#### City name, used for purposes associated with the city name

**Policy (2007 PDP):** Available, but challenge mechanism to governments to initiate an objection. Applicants should be aware of GAC Principles. Applicants must represent that the use of the proposed string is not in violation of the national laws in which the applicant is incorporated.

**Implementation (2012 AGB):** Requiring support/non-objection from relevant governments or public authorities.

#### String coinciding with a city name, but used for non-geographic purposes

**Policy (2007 PDP):** Available, but challenge mechanism to governments to initiate an objection. Applicants should be aware of GAC Principles. Applicants must represent that the use of the proposed string is not in violation of the national laws in which the applicant is incorporated.

Implementation (2012 AGB): No requirements.

Exact match of a sub-national place name, such as a county, province, or state listed in ISO 3166-2

Example: Badakhshān (AF-BDS) in Afghanistan

**Policy (2007 PDP):** Available, but challenge mechanism to governments to initiate an objection. Applicants should be aware of GAC Principles. Applicants must represent that the use of the proposed string is not in violation of the national laws in which the applicant is incorporated.

**Implementation (2012 AGB):** Requiring support/non-objection from relevant governments or public authorities.

String listed as a UNESCO region or appearing on the "Composition of macro geographical (continental) regions, geographical sub-regions, and selected economic and other groupings" list

Examples: Europe, Northern Europe

**Policy (2007 PDP):** Available, but challenge mechanism to governments to initiate an objection. Applicants should be aware of GAC Principles. Applicants must represent that the use of the proposed string is not in violation of the national laws in which the applicant is incorporated.

**Implementation (2012 AGB):** Requiring support/non-objection from at least 60% of the respective national governments in the region and no more than 1 written statement of objection from relevant governments or authorities.

## **AOB**

Agenda Item #4
