

Category	Origin	
Open registries (Standard)	2012 Round	
Geographic	2012 Round	
Brand (Specification 13)	2012 Round	
Intergovernmental organizations	2012 Round	
Community registry	2012 Round	
Validated registry -- Restricted Registries with qualification criteria that must be verified	Brainstorm	Note from Jeff: Validated Registries (vTLDs) have not asked to be its own category
Not-for-profit or non-profit gTLDs, NGOs	Brainstorm	
Highly regulated / Sensitive TLDs	Brainstorm	
Exclusive Use Registries? (Keyword Registry limited to one registrant & affiliates)	Added by Jeff Neuman	
Closed Generics	Added by Steve Chan	
Open TLD with minor domain charter registration challenges - eg: .name and .biz	From Soumya Iyer	

Category	Attributes for specific purpose?	A set of specific requirements for the applicant?	Specific procedures to go through?	Specific conditions in the registry agreement; etc.?
Open registries (Standard)	N/A - standard typing in absense of any other category	N/A	N/A	N/A
Geographic	<ul style="list-style-type: none"> - A TLD string that meets the requirements of a geographic name (as defined in the Applicant Guidebook or new definition determined by the PDP?) - Helps ensure that relevant governmental, public authority, or service provider and user community are consulted prior to allocating a TLD to an applicant. - Possibly limited pool of potential applicants 	<p>Existing in AGB:</p> <ul style="list-style-type: none"> - Must provide evidence of support or non-objection from relevant entity, with acknowledgement of applicant's intended purpose for TLD 	<p>Existing in AGB:</p> <ul style="list-style-type: none"> - Must pass the Geographic Names Panel review 	<p>Current: None?</p> <p>In the Future:</p> <ul style="list-style-type: none"> - Intended usage will become a contractual requirement?
Brand (Specification 13)	<ul style="list-style-type: none"> - Could include: - Often-times closed registration policies - Likely minimal need for registrar services - Registrations likely do not drive income (i.e., cost center) - Possibly lower bars for technical/financial capabilities - Likely less (or no) need for registrant protections 	<p>Current:</p> <p>Requirements as defined in applying for Specification 13: https://newgtlds.icann.org/en/applicants/agb/base-agreement-contracting/specification-13-applications.</p>	<p>Current:</p> <ul style="list-style-type: none"> - Specification 13 requests (or future name/mechanism) must go through a public comment. - ICANN legal review and approval 	<p>Current: Must apply to qualify for Specification 13</p> <p>In the Future: Could be integrated into application submission process and contracting.</p>
Intergovernmental organizations	<ul style="list-style-type: none"> - Exact match, full names of IGOs will be Ineligible for Registration (note, not as a Reserved Name). Currently in implementation. - Limited pool of potential applicants 	None currently identified	<p>There must be an exception procedure if the IGO wants their name. Currently in implementation.</p>	<p>Current: Special provisions as defined in base agreement for IGOs or governmental entities only</p>
Community registry	<ul style="list-style-type: none"> - Operated for the benefit of a clearly delineated community. - May have registration policies that restrict potential registrants, as well as usage. - Possibly limited funding/capital - Limited registrant base 	<p>Existing in AGB (paraphrased from section 1.2.3.1)</p> <ul style="list-style-type: none"> - Ongoing relationship with the community - Applied-for string strongly and specifically related to community named in application - Registration and use policies commensurate with community-based purpose designated - Endorsement by one or more established institutions representing community 	<p>Existing in AGB:</p> <ul style="list-style-type: none"> - Not evaluated unless as part of Community Priority Evaluation 	<p>Current: Special provisions as defined in base agreement for community-based TLDs only</p>
Validated registry -- Restricted Registries with qualification criteria that must be verified	<ul style="list-style-type: none"> - Will have registration policies that restrict potential registrants, as well as usage. - Likely minimal need for registrar services - Likely limited registrant base 	<p>Look at requirements at https://www.vtld.domains for an example.</p>		<p>Note that the vTLDs have not asked for a separate agreement or even differential specifications.</p>
Not-for-profit or non-profit gTLDs, NGOs	<ul style="list-style-type: none"> - Operated for public benefit - Possibly limited funding/capital 			
Highly regulated / Sensitive TLDs	<ul style="list-style-type: none"> - Operated to enhance security and trust within TLD space - Will have registration policies that restrict potential registrants, as well as usage. - Possibly limited registrant base 			

Category	Attributes for specific purpose?	A set of specific requirements for the applicant?	Specific procedures to go through?	Specific conditions in the registry agreement; etc.?
Exclusive Use Registries? (Keyword Registry limited to one registrant & affiliates)	<ul style="list-style-type: none"> - Will have highly restrictive registration policies. - <i>Likely minimal need for registrar services</i> - Registrations likely do not drive income (i.e., cost center) - <i>Possibly lower bars for technical/financial capabilities</i> - Limited registrant base 			
Closed Generics	<ul style="list-style-type: none"> - Will have registration policies that restrict potential registrants, as well as usage. - Likely minimal need for registrar services - Registrations likely do not drive income (i.e., cost center) - Possibly lower bars for technical/financial capabilities - Limited registrant base 			
Open TLD with minor domain charter registration challenges - eg: .name and .biz (Note: perhaps this could be rephrased as Open TLD with targeted audience (e.g., .name, .biz, etc.))	<ul style="list-style-type: none"> - Does not seem materially different than Open registries (Standard) 			The reason I initially brought this up was to allow TLDs with a certain amount of policy authority to revise requirements without having to get ICANN's approval.
Governmental Organization Applicants
