RDS PDP WG Membership Expertise Survey

Areas of Expertise relevant to this PDP For each area listed below, please indicate your own individual level of experience or expertise with the topic, using a scale of 1-5: None (1), Basic (2), Average (3), Advanced (4), Expert (5). If you have experience or expertise in several topics, please indicate all that apply - even if a topic is not your current profession or job focus. You may simply skip any topic that you do not consider among your areas of expertise. Please indicate your level of expertise for each of the following topics (select all that apply):

|--|---|
| <p>I have over eleven years of technical experience as a registrar connecting to both ccTLD and gTLD registries. MarkMonitor's domain management platform allows some of the largest brand and domain name portfolio owners to securely manage their valuable domain name assets.</p> | 1 |
| <p>We specialize in DNS information that is used by governments, law enforcement, healthcare, finance, major brands, security researchers and managed service providers, etc. We are not any of those orgs, those. So, I am uncertain how or where my experience would be reside. Because of the varied users of our data and services, I have a lot of knowledge of why DNS information is critical and how it is used that I can contribute to this topic.</p> | 2 |
| <p>I stopped when I got to a bunch of categories that sounded meaningless.</p> | 3 |
| <p>Over the 30+ years commercial and IT experience I have been involved at high levels with: * software design * database design * systems development * data archiving and analytics * domain registration systems My current roles involve * expert witness work for courts (investiagtion, production of reports, giving evidence) * running an accredited registrar * mergers & acquisitions consultancy for web hosts</p> | 4 |
| <p>I am with Symantec Corporation, the world's largest CA. We make extensive use of WHOIS data in our issuance of SSL/TLS certificates.</p> | 5 |
| <p>I have over 20+ years of Registry, Registrar, ISP, Hosting Provider Experience. Consisting in various mid to senior management roles in: Product, Marketing, Operations, Policy, Lobby, Corporate Strategy, Corporate Development Strategy, P&L Owner and Business Development.</p> | 6 |

Working for the European Cybercrime Centre (EC3) I have direct access to a wide group of mainly European cyber investigators (law enforcement). I am in the process of establishing an informal network of investigators who are willing to provide their practitioners' experience of working with the WHOIS in the framework of their investigations. I am planning to circulate formal/informal outreach requests from the NGRDS WG to them to gather their thoughts. Hopefully this can contribute constructively to the work of the NGRDS WG. I will probably have to route this back to the WG through the GAC PSWG.	7
As discussed this poll is a blunt instrument, hard to capture expertise. I am a retired public servant, 30 years mostly doing information policy and privacy. I am not a lawyer but worked for ten years leading the drafting team of the Canadian privacy standard and private sector law. I have done every aspect of govt privacy policy implementation over the years, including a two year stint at the Office of the Privacy COMmissioner as the DIrector of research and policy. I have worked in international trade on information policy issues, including IP, trade in telecom, ITU, data protection and cybersecurity. Over the years I have dealt extensively with law enforcement/privacy tensions, so while not a law enforcement official I am familiar with a large number of the issues and debates. I worked as a CPO for a software development company (Zero Knowledge Systems, makers of anonymizing software and secure credentials), so that while not a software developer myself I am familiar at the C level with the issues and operational requirements. Finally as a consultant and academic I am familiar with research issues, from a non governmental, commercial, and non-commercial perspective. as a former member of the EWG I have some familiarity with WHOIS issues.	8
My expertise is in cross sectors co-operation. It is important to look not at the different sectors separately but how they can constructively interact. Where are the win/win situations.	9
My expertise lies in policy related to data protection and security, especially how this overlaps with technical requirements, market and consumer protection.	10
Not sure what "Consumer" is supposed to mean. I buy a lot of stuff online, so I'll say I'm an expert! ;-)	11
Was a Police Officer dealing with Cyber Crime - Europol EC3. Am now with an RIR - RIPE NCC but don't see that listed as an Area of expertise.	12
Former member of the EWG on gTLD registration data.	13
I served on the EWG and have served on multiple ICANN PDPs related to various aspects both technical and policy related to the DNS. I currently serve on the advisory board of several ccTLDs and am actively involved in several projects dealing with various aspects of cybercrime, abuse and other security topics	14
experience in domain name dispute resolution policies	15
I am an expert of cryptography and cyber security. Currently I am a Ph.D Student in the field of cyber security and attacks/spam propagation in computer and communication networks. I also	16
cyberlaw expertise	17
DNS protocols and DNS operations (eg, name servers and domain name resolution)	18

Simple End-user with no prior knowledge of Whois	19
Identity, Authentication, Applied Cryptography (Data Integrity, Encryption, Digital Signatures), Public Key Infrastructure.	20
"Please indicate your level of expertise for each of the following topics (select all that apply)" I would just like to comment that some of these are not topics, rather positions or occupations. It is unclear whether the poll asks to know how much we know about these positions in context of the PDP or whether we actually hold any of these positions.	21
