<p>Zak Muscovitch</p> <p>"How one guy games new gTLD sunrise periods", DomainIncite, April 17, 2014</p> <p>http://domainincite.com/16492-how-on-e-guy-games-new-gtld-sunrise-periods</p> <p>==</p> <p>This article shows the example of someone registering trademarks specifically in order to get priority for Sunrise registrations. It also shows how the low threshold for use was met. The registrant registered three Swiss trademarks at relatively low cost in connection with pens so as to easily be able to demonstrate use. The marks were for common terms, namely DIRECT, SOCIAL, and CLOUD.</p>	<p>See Sunrise Questions Table, Q1(d) through (f).</p> <p>==</p> <p>This article documents instances of how the current system may be used in a manner which was not intended and which may in the view of some registrants, trademark owners, and registries, constitute an abuse of the current system which requires consideration of potential revisions. One must wonder whether it is fair for the current system to enable a sophisticated participant to get first dibs on such common terms through this method, and whether this outcome was what was intended.</p>	<p>George Kirikos: I think Zak is referencing charter Preamble questions (d) through (f), and I agree with that analysis. It also might help inform our work on charter Q1(a) [expanding matches when so many dictionary terms have been gamed would allow even more gaming], Q5(b) [potential elimination of mandatory sunrise], Q9 (limiting to the class of goods/services might reduce gaming), and Q10 ("token use" not properly addressed by TMCH validation system). In addition to the article itself, the comments below the article (particularly by John Berryhill) further illustrate the issues.</p>
<p>Zak Muscovitch</p> <p>"Fake Trademarks Stealing Generic Domains In New gTLD Sunrises", OnlineDomain.com, April 15, 2014</p>	<p>See Sunrise Questions Table, Q1(d) through (f).</p> <p>==</p>	<p>George Kirikos: again, I think Zak is referencing charter Preamble questions (d) through (f), and I agree with that analysis. It also might help inform our work on charter Q1(a) [expanding matches when so many</p>

<p>https://onlinedomain.com/2014/04/15/egal/fake-trademarks-stealing-generic-domains-in-new-gtld-sunrises/</p> <p>==</p> <p>This article tells how a sophisticated party used the current Sunrise system to acquire 300 premium generic domain names before anyone else. The registrant registered domain names such as cloud.guru, social.photos, Build.house, BET.guru, online.bike, VACATION.photos, discount.repair etc., using genuine trademarks for goods such as pens, guitar picks, etc., solely in order to get priority registration. The article calls this a "Sunrise scavenger scam" and claims that the only purpose of acquiring the corresponding trademark rights was to game the current system.</p>	<p>This article documents instances of how the current system may be used in a manner which was not intended and which may in the view of some registrants, trademark owners, and registries, constitute an abuse of the current system which requires consideration of potential revisions. One must wonder whether it is fair for the current system to enable a sophisticated participant to get first dibs on such common terms through this method, and whether this outcome was what was intended.</p>	<p>dictionary terms have been gamed would allow even more gaming], Q5(b) [potential elimination of mandatory sunrise], Q9 (limiting to the class of goods/services might reduce gaming), and Q10 ("token use" not properly addressed by TMCH validation system). In addition to the article itself, the comments below the article further illustrate the issues.</p>
