	should continue to send the notice to all contacts publicly available in RDDS; however, along with the Notice of Lock, the Provider may also request the non-public registration data for each of the specified domain names from the registrar, which shall be provided to the Provider upon the Provider notifying the Registry or Registrar of the existence of a complaint. 6. URS section 6 contains a procedure for default cases. Section 6.2 requires that "During the Default period, the Registrant will be prohibited from changing content found on the site to argue that it is now a legitimate use and will also be prohibited from changing the Whois information." Updates to this section may be considered to provide clarity on the information that may not be changed by a registrant, i.e., public and non-public data elements. 7. URS section 9.4 requires that "Determinations resulting from URS proceedings will be published by the URS Provider on the Provider's website in accordance with the Rules." Concerning the publication of decisions, it may be useful to reference Purpose 6-PA5 in the Final EPDP report regarding publication of registration data elements used for complaints on Dispute Resolution Provider websites to Internet users.		any final proposal/recommendation to be consistent with this update. 7. Not currently addressed by the WG — can be addressed as part of its resolution of URS Question #1. Notes: WG should consider relevance of Purpose 6-PA5 to the proposal by a Sub-Group B member in response to URS Question #1. If proposal does not move forward, WG can develop an additional URS recommendation, specifically limited to reference Purpose 6-PA5 regarding publication of registration data elements in URS Determinations.
	8. URS section 10.2 requires that "The Whois for the domain name shall continue to display all of the information of the original Registrant except for the redirection of the nameservers. In addition, the Registry Operator shall cause the Whois to reflect that the domain name will not be able to be transferred, deleted or modified for the life of the registration" This language may be updated to refer to registration data rather than Whois.		

Policy / Procedure	Ту	pe of changes required ¹	for	ssible next step GNSO Council arch 2020)	Proposal from RPM PDP support staff (July 2020)
	9.	Feedback from some stakeholders in June 2019 during an ICANN65 session noted the work plans of the RPM PDP Working Group, but posed the question of whether there were some procedural quick fixes to the UDRP and URS that could be adopted without waiting for the policy development process to complete. The GNSO may wish to consider this feedback in determining next steps.			
Uniform Rapid Suspension	1.	Consistency of terminology (WHOIS/RDS/Whois data/Registration data)	1.	Request EPDP Phase 1 IRT or establish new	1., 2., 3., 4., 5., 8.: As with URS Procedure (above), address through Implementation Guidance.
System Rules (URS Rules) The URS Rules	2.	URS Rules section 1 includes definitions of terms used. If changes are considered to these rules as a result of GNSO policy work, it may be beneficial to update this to include the term and definition for "Registration Data Directory Services.	2	IRT to address terminology updates	Terminology update to be done either by EPDP Phase 1 IRT (already in place) or eventual RPM Phase 1 IRT. Decision to be made by ICANN org (GDD) managing RPM Phase 1
describe how service providers will implement the URS in a consistent manner.		URS Rules section 2(a)(i) includes references to the Administrative Contact. The context of this provision is the UDRP provider's responsibility to use available means to achieve notice when notifying a registrant that a UDRP complaint has been filed. The references to Administrative Contact can be removed without altering the substance of the requirement.	2.	the RPM PDP WG to determine which, if this item has already been addressed, or	implementation based on anticipated timelines for both IRTs. Implementation Guidance to clarify that URS Procedure/Rules terminology updates at this time not meant to exclude any other terminology updates that will be needed (e.g. by UDRP
	4.	Also in URS Rules section 2(a), the stated principle is that, when forwarding a complaint, "it shall be the Provider's responsibility to employ reasonably available means calculated to achieve actual notice to Respondent." Given this aim, it may be beneficial to clarify that the Provider should continue to send the notice to all contacts publicly available in RDDS, and also to note that, per EPDP recommendation 23, the provider may also request non-public registration data from the registrar, which		could be easily addressed, without compromising the timeline. Based on feedback,	review in Phase 2 or additional EPDP recommendations). 6. Addressed – see proposed recommendation about translating and transmitting notices of complaint (URS Recommendations #3 & #4) but these

Policy / Procedure	Type of changes required ¹	Possible next step for GNSO Council (March 2020)	Proposal from RPM PDP support staff (July 2020)
	may aid the provider in enabling the notification to the registrant.	determine appropriate next steps	will not affect the methods of transmission.
	5. URS Rules section 3(b)(iv) require a complaint to include the domain name(s) that are the subject of the Complaint and "a copy of the currently available Whois information." This may be updated to clarify that a complaint will not be deemed administratively deficient for failure to provide the name of the Respondent and all other relevant contact information.	3. Request EPDP Phase 1 IRT or establish new IRT to address removal of reference to administrative	7. As with the URS Procedure (above), can address through resolution of URS Question 1.
	6. URS Rules 4(b) provide that the Notice of Complaint sent to the registrant shall be transmitted in English and translated by the provider into the predominant language used in the registrant's country or territory, as determined by the country(ies) listed in the Whois record when the Complaint is filed. This provision may not be affected by the new Registration Data Policy because the country field is still publicly displayed. With regard to 4(b), it may be beneficial to clarify that the provider may also request non-public registration data from the registrar upon presentation of a complaint.	contact 4-8 Consult with the RPM PDP WG to determine which, if this item has already been addressed, or could be easily addressed, without compromising the	
	7. URS Rules section 15.4 requires that, with certain exceptions, "the Provider shall publish the Determination and the date of implementation on a publicly accessible web site." Concerning the publication of decisions, it may be useful to reference Purpose 6-PA5 in the Final EPDP report regarding publication of registration data elements used for complaints on Dispute Resolution Provider websites to Internet users.	timeline. Based on feedback, determine appropriate next steps	
	8. Many of the points discussed here mirror those discussed in the URS Procedure analysis, above. If changes are considered to		

Policy / Procedure	Type of changes required ¹	Possible next step for GNSO Council (March 2020)	Proposal from RPM PDP support staff (July 2020)
	these rules as a result of GNSO policy work, it may be beneficial to more clearly differentiate the content of the procedure and the rules to avoid redundancies.
