Letter of motivation: Second Security, Stability, and Resiliency of the DNS SSR2 Review Team

SSR2 Review Selection Committee,

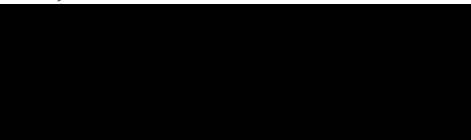

I am writing to express my interest in joining the SSR2 review team. I have been a member of the Business Constituency (BC) since 2009 and have been in attendance at ICANN meetings since 2007. Although I reside within the BC, my expertise holds sixteen plus years of security experience outside of ICANN.

Currently I am the President of Kvant Corporation, a Cyber Security Consulting Firm I started after working thirteen years as military and government contracting conducting cyber exploitation, attack and defense for the U.S. Government. As a security practitioner for the past sixteen plus years, I have explicit deep operational knowledge of all of the skillsets set forth in the SSR2 Skills and Experience requirements, both working within private and public sectors. I currently utilize my knowledge and experiences to protect clients from cyber security threats across the security lifecycle.

As a Security Practitioner and being involved with ICANN, I fulfill all of the desired attributes set forth in the SSR2 call for volunteers. As well using my knowledge and experiences to educate those that are willing to learn.

Thank you for your consideration.

V/r,

Scott McCormick
