#	RESPONSES	DATE
1	Scott has hands on cybersecurity experience which I think is essential for the RT.	2/16/2018 5:50 AM
2	The candidate has extensive knowledge of the ICANN community and this will be a good asset for the group.	2/16/2018 3:48 AM
3	RySG supports candidate Rao Naveed Bin Rais, both from perspective of diversity between constituencies (James Gannon was from NCUC, and Naveed is from NCUC), and benefit from having scientific point of view in the Review Team (not to limit it to view from the Enterprise world, which is represented in the current SSR2-RT quite well) Though, given the text of the letter of 06th FEB 2018, <a href="https://gns0.icann.org/en/correspondence/gns0-council-to-so-ac-leaders-06feb18-en.pdf">https://gns0.icann.org/en/correspondence/gns0-council-to-so-ac-leaders-06feb18-en.pdf</a> ( GNSO Council to ICANN Board SSR2-RT co-chairs and members, where GNSO Council marks current selection of the replacement member for James Gannon to be a minimal step (and wording that the GNSO Council can prepare itself if appropriate to nominate additional SSR2-RT candidates and outside experts to augment the current group and/or to replace any Review Team members who have resigned, or do not wish to continue in their role. ) I think we could recommend to request assigning another seat to the other candidate (whoever wins, Scott McCormick or Rao Naveed Bin Rais), as allowed seat limit for SSR2-RT is not reached yet (21 seats).	2/12/2018 3:04 PM
