

# CSC Findings of IANA Naming Function Performance Report for the Month of June 2020

Date: 17 July 2020

---

## Overall Finding

The CSC completed review of the June 2020 IANA Naming Function Performance Report and finds that PTI's performance for the month was:

Excellent- PTI's performance over June 2020 was 100%. PTI met all 64\* of the currently defined thresholds. The current list of thresholds is included in PTI's performance report.

*\* for the CSC's April and May reports, the number of metrics were incorrectly published as 65 when there were 63. The publication error did not affect the assessment of PTI's overall performance as all thresholds were met at 100% and all numbers for individual metrics were correct. On 01 June 2020, two new ccTLD creation/transfer SLAs were added and one was removed, bringing the current total to 64.*

## Metrics That the CSC is Tracking Closely

Currently, there are no metrics requiring close tracking.

## SLA metrics that are in the process of being changed

Currently, there are no SLAs in the process of being changed.

## Report of Escalations

No new escalations have been received during this reporting period.
