Dear Pitinan and all,

As discussed, I have reviewed the text files, the valid and invalid results against each word formation are appropriate according to the WLE rules, so they are all fine and good to go.

Only one small finding is there, the code point should be U+0B71 instead of U+0B35 where ever applicable, as U+0B35 is not included in the Odia LGR repertoire, hence in few words, it shows invalid.

Thanks and best regards  
Kuldeep Patnaik

Dear Kuldeep,

As the RZ-LGR-3 was released for public comment on 25 April 2019. We ran the test for the integrated Oriya LGR and compared the result with the test result from the final proposal. Please find the test result and please the comparison files as attached.

In general, the validating results are the same. There are only changes in some of the WLE rule name e.g. remove the word 'only'.

Kindly review and if you or NBGP could provide the feedback via the public comment platform, it would be very useful.

To submit, please visit <https://www.icann.org/public-comments/rz-lgr-3-2019-04-25-en> [icann.org], click "submit Comment" button.

Best Regards,

Pitinan
