Dear Andrew,

I am writing to you as regulator to request that you contact Internet Assigned Number Authority (IANA) to confirm the recent decision by the Falkland Islands Government to maintain Falklands Summer time throughout the year. Correct time information is essential in maintaining the network and if it is incorrect can impact on the service customers received.

IANA now have responsibility for the global time zone database. The current Atlantic/Stanley entry under South America expects the clocks to go back to standard Falklands Time (FKT) on the 15th April. The database entry states that in 2011 Stanley was staying on fixed summer time on a trial basis only.

FIG need to contact IANA and/or the maintainers of the database to inform them we're adopting the same policy this year and suggest recommendations for future years. Although C&W and Tim Cotter are already known to IANA as administrators of the .fk TLD, it is the responsibility of FIG to approve changes to the time zone database.

This work needs to be undertaken promptly by FIG given the time it will take to make the changes to the global time zone file and for its distribution. Please can you let me know as soon as this work has been undertaken?

Yours sincerely,

A handwritten signature in black ink, appearing to read 'J. a. McPhee'.

Justin McPhee, Chief Executive, Cable & Wireless Falkland Islands
