

Protocol for use of UA Geographic Mailing Lists

V 0.2

The UASG support the development of regional, national and local groups advocating Universal Acceptance in their respective communities.

Where it will be useful, the UASG will create and operate mailing lists to help facilitate these efforts.

To be clear, the provision of these mailing lists:

- Does not include secretarial support
- Does not include funding

Participation in mailing lists will be subject to ICANN's community participation standards and will not be restricted.

Each Geographic Mailing list will be publically archived.

Each Geographic Mailing list will have an identified administrator from within the community.

The UASG expects the list administrator to act as a liaison with the UASG and provide regular reports of activities in both directions.
