Universal Acceptance

31 January 2018

Universal Acceptance Steering Group
Help Wanted: EAI Email Provider

Application Deadline: **23:00 UTC 15 February 2018**
Send Applications to: don.hollander@icann.org

The Work
The UASG is looking for an Email provider to host mail in the uasg.tech domain.

Explicitly, the service must:
- provide hosting for @uasg.tech mail addresses, ideally including non-ASCII local part mailboxes
- be able to send to and receive from EAI addresses
- be able to support IMAP and POP3 and SUBMIT with SSL and/or TLS
- provide an anti-spam/anti-virus service
- be able to provide a webmail facility.

We expect about 10 email addresses to be allocated.

Background
Universal Acceptance is a foundational requirement for a truly multilingual Internet, one in which users around the world can navigate entirely in local languages. It is also the key to unlocking the potential of new generic top-level domains (gTLDs) to foster competition, consumer choice and innovation in the domain name industry. To achieve Universal Acceptance, Internet applications and systems must treat all TLDs in a consistent manner, including new gTLDs and internationalized TLDs. Specifically, they must accept, validate, store, process and display all domain names.

The Universal Acceptance Steering Group is a community-based team working to share this vision for the Internet of the future with those who construct this space: coders. The group's primary objective is to help software developers and website owners understand how to update their systems to keep pace with an evolving domain name system (DNS).

Next Steps
Please provide us with:
- A brief statement of interest and why you want to do this work and why we should want you to do this work.
- A rate (in US$) inclusive of all costs and basis of the rate.
- Full contact details
- Two referees
