

Board Question #5

factors that affect potential success of the courses of actions to mitigate harm

Draft Answer (workspace below)

Workspace: for data and documentation

Applicable notes from Study 1

* Careful review of item (4) is what is needed here

Proposed Gap: * this is a risk analysis of the items that we identify in item (4)

Questions from [Study 2 Proposal, Appendix 3](#)

- This task will likely be highly dependent on the risk analysis of the items identified in Board question four.
- This will also be influenced by what we learn from name collisions that have occurred (e.g. an analysis of the ICANN name collision reports and retrospective analysis of DNS telemetry data).
