## Update of our Registry Registrar Agreement

Please find attached an update to our Registry Registrar Agreement (Version 1.1).

You will see that it is a basic housekeeping type of update, where we have, for example, updated references in regards to our website to be registry.sucks as opposed to the former nic.sucks. Additionally, we have clarified the purpose of the contract as well as streamlined the process for updates in the future to bring it in line with our obligations to ICANN under our Registry agreement.

This update will take effect on January 3, 2016 and become binding on all Registrars on that date.

You may find version 1.0 of the agreement for reference at <https://www.registry.sucks/docs/agreements/VoxPop RRA v1.0.pdf>

Should you have any questions regarding this update, please do not hesitate to contact us.
