(b) Registrar meets all the Registry's accreditation criteria, which include but not limited to those relating to the Payment Security.

2.2. Registry System Operation and Access. Throughout the term of this Agreement, Registry or its subcontractor shall operate the Registry System and provide Registrar with access to the Registry System to transmit domain name registration information for Registry TLD to the Registry System. 2.8. RNH Registration Agreement and Domain Name Dispute Resolution.

2.8.1 RNH Registration Agreement

Registrar shall have in effect an electronic or paper registration agreement with each Registered Name Holder which may be amended from time to time by Registrar (each a "**RNH Registration Agreement**"), provided a copy is made available to Registry upon request by Registry within 7 days. Registrar shall include in each RNH Registration Agreement those terms required by the RAA, this Agreement and the Registry Agreement, including but not limited to:

using both an X.509 server certificate issued by a commercial Certification Authority identified by Registry and its Registrar password, which it shall disclose only to its employees with a need to know. Registrar agrees to notify Registry within four (4) hours of learning that its Registrar password has been compromised in any way or if its server certificate has been revoked by the issuing Certification Authority or compromised in any way.

2.9.3 Upon prior written notification to Registrar, Registry or Registry Services Provider may require other industry standard security provisions, practices or technology to ensure that the Registry System is secure and stable, which Registry may adopt from time to time in its sole and complete discretion.

2.10.1 Registry's privacy policy is available at (<http://en.nic.wang/privacy.html?titleID=0>), which sets out the purposes for which Personal Data submitted to Registry by Registrar is collected, the intended recipients (or categories of recipients) of such Personal Data, and the mechanism for access to and correction of such Personal Data. 2.11. Authorization Codes. Registrar shall not provide identical Registrar-generated authorization <authinfo> codes for domain names registered by different registrants with the same Registrar. Registry in its sole discretion may choose to modify <authinfo> codes for a given domain and shall notify the sponsoring registrar of such modifications via EPP compliant mechanisms (i.e., EPP<poll> or EPP<domain:Info>). Documentation of these mechanisms shall be made available to Registrar by Registry. The Registrar shall provide the Registered Name Holder with timely access to the authorization code along with the ability to modify the authorization code within five (5) calendar days.

2.12. Domain Name Lookup Capability and Whois Service. Registrar agrees to employ in its domain name registration business Registry's registry domain name lookup capability to determine if a requested domain name is available or currently unavailable for registration. Registrar also agrees, at its expense, to provide an interactive web page Whois service providing free public query-based access to up-to-date (i.e., updated at least daily) data concerning all active Registered Names sponsored by Registrar for Registry TLD. The data accessible shall consist of elements that are designated from time to time according to an ICANN adopted specification or policy or the RAA.

in accordance with the Registry Agreement or other arrangement with ICANN; and

(b) Operational standards, policies (including Registry Policies), procedures, and practices for Registry TLD established from time to time by Registry (including its subcontractors) in a non-arbitrary manner and applicable to all registrars (the "**Operational Requirements**"), and consistent with the Registry Agreement, as applicable, upon Registry's notification to Registrar of the establishment of those terms and conditions.

2.16. Resolution of Technical Problems or Breach of Agreement. Registrar agrees to employ necessary employees, contractors, or agents with sufficient technical training and experience to respond to and fix all technical problems concerning the use of the Supported Protocol, the APIs and the systems of Registry in conjunction with Registrar's systems. Registrar agrees that in the event of significant degradation of the Registry System or other emergency, or upon Registrar's violation of Operational Requirements or breach of this Agreement, Registry may, in its sole discretion, temporarily suspend or restrict access to the Registry System.

Such temporary suspensions or restrictions shall be applied in a non-arbitrary manner and shall apply fairly to any registrar similarly situated, except where such action is requested by ICANN pursuant to ICANN's authority under the terms of the RAA to: (i) suspend or terminate Registrar's ability to create new Registered Names; or (ii) transfer Registered Names to a registrar designated by ICANN.

2.17. Prohibited Domain Name Registrations. In addition to complying with ICANN standards, policies, procedures, and practices limiting domain names that may be registered, Registrar agrees to comply with applicable statutes and regulations limiting the domain names that may be registered.

2.18. ICANN Requirements. Registry's obligations hereunder are subject to modification at any time as the result of ICANN-mandated requirements, including all Consensus Policies, any Temporary Policies and any amendments to the Registry Agreement. Notwithstanding anything in this Agreement to the contrary, Registrar shall comply with any such ICANN requirements in accordance with the timeline defined by ICANN.

2.19. Accredited Registrar. During the term of this Agreement, Registrar shall maintain in full force and effect its accreditation by ICANN.

2.20. Compliance with Applicable Laws and Regulations and Registration Data Verification. In providing domain name registration services, Registrar must comply with all applicable laws and/or requirements of relevant governmental authorities. Specifically, Registrar shall meet or exceed all ICANN and Registry's requirements regarding public access to and accuracy of registration data, including those set forth in the "Whois Specification" and the "Whois Accuracy Program Specification" attached to the RAA and as amended from time to time. If Registrar provides domain name registration services within the PRC, it shall at its own cost, verify and ensure that all registration data (including without limitation, the Registered Names and the identities of all Registered Name Holders) to be submitted to Registry complies with and fulfills all requirements, rules and guidelines prescribed by:

- (a) all relevant PRC laws governing Registrar's operations within the PRC, including without limitation, the Administration of China Internet Domain Names Procedures (中国互联网络域名管理办法), as amended from time to time; and
- (b) all relevant governmental authorities, including without limitation, the Ministry of Industry and Information Technology of the PRC (工业和信息化部).
