Re: The change of Registry-Registrar Agreement

The .信息(xn--vuq861b) Registry Operator (“Registry”) was selected to participate in the ICANN annual audit back in January 2017. The Initial CIANN Compliance Audit Report, which was issued in May, 2017 finds several compliance issues, some of which require the change or update of the Registry-Registrar Agreement (“RRA”) signed between the Registry and accredited registrars.

Registry made changes accordingly to insert languages in the RRA template as required by the Initial Audit Report. To sum up, major changes of the RRA are as follows:

1. The addition of equitable treatment of registrars, which is added as the clause 2.5.
2. The addition of registrar’s obligation to abide by third party rights protection as regards to URS domain extension, which is incorporated in the Clause 3.3.
3. The addition of registrar’s obligation as regards to their obligation to include provision prohibiting Registered Name Holders from distributing malware, abusively operating botnets, phishing, piracy, trademark or copyright infringement, which is incorporated in the Clause 3.4 and Clause 3.5.

As per Section 2.9(a) of the Registry Agreement, Registry hereby uploads this RRA with all changes marks in the GDD portal for ICANN’s review and approval. Please don’t hesitate to let us know should you have any further questions.

Sincerely,

Yaling Tan
