Re. Registry Registrar Agreement v6.0 – List of Amendments

Dear members of the Registrar Stakeholder Group,

Following ICANN's approval of our implementation of the Temporary Specification¹, Uniregistry has made some changes in its Registry Registrar Agreement ("the RRA") for all the extensions of which we are Registry Service Provider. In accordance with ICANN Procedure for Consideration of Proposed Amendments to gTLD Registry-Registrar Agreements² ("the Procedure"), you will find attached a redlined version and a clean version for your comments and approval.

For your convenience, here is a summary of the changes made in this version:

- **Added:** section 2.6 on Data Subject rights to deal with the exercise of such right with the Registry by the Registered Name Holder;
- **Removed:** section 2.9.1 "Submission of Complete Registration Data". Having listened to the feedback of some accredited Registrars, we have decided to remove that obligation in this updated version of the Agreement;
- **Changed:** section 8.4 "Amendments". The clause has been simplified and we now explicitly refer to the Procedure;
- **Added:** definition of "Console", which describes the interface all Registrars are using in their dealings with Uniregistry, and where important documents are made available to the Registrar;
- **Added:** section 2.21 on "Regular Communications", which describes the way changes to our policies will be advertised to our Registrar partners.

Thanks for your continued support. Feel free to contact us (Compliance@Uniregistry.link) with any question you may have.

Best regards,

Jean-Christophe Vignes
Director of Compliance
