Re: Registry-Registrar Agreement Amendment for TLDs to add the Temporary Specification for gTLD Registration Data

I attest that Limited is amending its Registry-Registrar Agreements for the TLD under the management of this registry operator listed in the Naming Services portal, to include the approved language referenced by the Temporary Specification for gTLD Registration Data.

The only addition made to the Model DPA is the following language in Annex 1 if and as it relates to .XXX verification:

4. In addition to the Shared Personal Data in Section 3 above and for the limited purpose of provisioning, servicing, managing and maintaining domain name eligibility requirements for .XXX Data Subjects may provide Personal Data to the Registrar, the Registry and/or approved third party agents for eligibility validation or verification in connection with the purchase and/or maintenance of a domain name.

Attached is the amended Registry-Registrar Agreement to replace or supplement, as applicable, the approved Registry-Registrar Agreement that is attached as an appendix (if any) to Registry Operator's Registry Agreement.

Signed,

*Sheri Falcon*
