Re: Registry-Registrar Agreement Amendment

Radix FZC is hereby requesting ICANN approval for amendment of its Registry Registrar Agreements for all ten (10) of its top-level domains (.Fun, .Host, .Space, .Press, .Website, .Site, .Online, .Tech, .Store, and .Uno). The primary purpose of the amendment is to delete the sections pertaining to obligations applicable at the time of launch of the TLDs (such as Sunrise, Landrush, early access programs, etc.) amongst other minor updates.

Attached are the proposed, red-lined Registry-Registrar Agreements for ICANN's review.

Sincerely,

A handwritten signature in black ink, appearing to read "Sandeep Ramchandani", with a long horizontal flourish extending to the right.
