RE: Identity Digital RRA Updates

Dear Mr. Weinstein,

Identity Digital Inc., formerly Donuts Inc., on behalf of its registry operator subsidiaries Binky Moon, LLC, Dog Beach, LLC, Identity Digital Limited, Monolith Registry LLC, and Global Website TLD Asia Limited (collectively, "<u>Identity Digital</u>"), wishes to amend the Registry-Registrar Agreement ("<u>RRA</u>") for the top-level domains listed in **Exhibit A** (the "<u>TLDs</u>").

We have included with this submission a redlined version of the RRA showing our proposed changes, a clean version of the RRA, a redlined version of the Data Processing Agreement ("<u>DPA</u>") showing the proposed changes, and a clean version of the DPA. We anticipate the changes detailed below will be of particular interest to registrars and wish to be as transparent as possible about our motivations for seeking the proposed changes. The relevant sections of the RRA are noted below in bold.

- <u>Corporate re-branding</u>: Throughout the document references to "Donuts" have been updated to refer to "Identity Digital." In 2021, Donuts Inc. undertook a rebrand and changed its corporate name to Identity Digital Inc. There is no change to the legal contracting entity in the RRA besides an update to the entity's name. Documentation showing the entity name change can be provided upon request.
- 2. <u>Multiple Registrars</u>: We have updated the signature block of the RRA as well as text in the **Introduction** to permit a registrar to sign one RRA on behalf of mutilple registrars within its family of companies. Identity Digital has received multiple requests from registrars to simply the onboarding process by allowing them to execute one RRA for an entire family of related registrars and we propose this change to facilitate this request.
- 3. <u>Verifications:</u> **Section 3.7.3.**, regarding procedures by which Identity Digital may verify compliance by the registrant of a domain name in the TLDs with the Registry Policies, has been updated to reflect that Identity Digital will soon no longer collect contact data

for domain names registered in the TLDs. Under the amended language, registrars may be required to verify registrant compliance with the Registry Policies on behalf of Identity Digital. We believe this change is beneficial to registrars, who prefer to handle interactions with their customers.

- 4. <u>Obligation to Escrow Registration Data</u>: Section 3.7.3. has been further amended to clarify that registrars are obligated to Identity Digital to comply with ICANN policies regarding escrowing registration data in the TLDs. Pursuant to the Registration Data Policy, Identity Digital will soon cease collecting all domain name contact data from registrars, making registrars the sole source of domain name ownership information for domain names registered in the TLDs. This proposed amendment enables Identity Digital to directly monitor a registrar's compliance with its data escrow obligations to ensure Identity Digital is able to reconstruct the zone in the event of a registrar's failure.
- 5. <u>Document Structure</u>: As requested by certain Registrars and in line with standard industry practice, forms of the Registry Policies are being relocated to be more accessible to registrars and registrants. The RRA has been updated to remove the exhibits containing the forms of certain Registry Policies, such as the Terms and Conditions, Payment Policy, and technical onboarding documentation, from the RRA itself. These Registry Policies will continue to be accessible to current and prospective registrars through the Registrar Admin Website or the Registry Website, as applicable. The proposed amendment does not impact existing requirements regarding changes or additions to these policies.

We hope that you will find these changes acceptable and agree with our recommendations. If you have any questions or concerns about our proposed changes, we are prepared to discuss them with you at your convenience. Please direct any such questions or concerns to myself at <u>alvaro@identity.digital</u> and my colleague, Omar Contreras at <u>omar.contreras@identity.digital</u>.

Sincerely,

Alvaro Alvarez EVP, General Counsel & Secretary Identity Digital Inc.
