

Following Flowchart x.x

Question: What role does the Council play to 'affirm' that a change that is in violation of policy can be implemented?

*in response to suggest to add this*

The SPIRT confers with the GNSO Council

*exception*

*new policy*

*I agree that this second diamond is useful and should be retained as is. It makes sense for GNSO Council to ask & answer this question to establish the yes/no paths.*

*maybe move this box down to better distinguish exception versus new policy*
